

III. Smile Design hands-on course

Lecturer: Dr Mária Csillag

To create a harmonious smile is a really difficult task. It is an inspiring and challenging concept that provides the proficient, precise and particularly aesthetics-responsive dentist with extraordinary experiences. Aim of the hands-on course is to help to learn the ways of making a “brilliant smile”, how to achieve a radiating personality with the treatment and how harmony is born through our work.

The course includes theory and hands-on training parts.

09.30-11.30: Topics in the introductory theoretical part:

1. Basics of Smile Design
2. Smylist® Smile Design: Designing Smiles Matching Personality and Character
3. Smylist® Smile-types
4. Smile Macro- and Microelements
5. Rules of Smile Design
6. Computer Aided Smile Design (Smylist® Professional Software)
7. Smile Making and Transformation by Direct Shell Veneer Technique

12.00-17.00: Hands-on training:

1. Interactive Smile Diagnostics
2. Smile Transformation by Direct Shell Veneer Technique with Enamel Plus (Micerium)

Everyone is welcome to take part in an exciting and challenging course who desires harmony and is driven to share it with their patients, too.
